

## Duck Donuts Nutrition and Allergy Information:

### **Caloric Information**

Each bare donut contains approximately 210 calories. For more information, view [Nutrition Information \(PDF\)](#) for all our menu items.

### **Key Ingredients**

Our vanilla cake donuts are fried in a soy based shortening and contain the following key ingredients:

- Wheat and corn flour
- Soybean oil
- Nonfat dry milk
- Egg yolks
- Beta carotene

### **Nut Allergy Information**

Chopped peanuts are a regular topping offering for our donuts. As such they are located on the topping tables and we cannot guarantee that they have not migrated during the topping process. If we are not extremely busy, we are willing to top a few donuts in our preparation area for you. This will lessen the chance that the peanuts have migrated into other toppings. However we cannot make guarantees to that regard.

Unfortunately we cannot guarantee 100% that any ingredients we use are not manufactured in a facility free of tree nuts or any other class of nuts.

### **Other Food Allergy Information**

Our donuts contain wheat gluten, dry milk and egg yolks.
