

What is UPCYCLING?

Upcycling is the art of transforming old, discarded items into something new, beautiful, and useful. It's about giving new life and purpose to objects that would otherwise end up in landfills. Through upcycling, we can tap into our creativity and imagination, turning everyday items into unique and one-of-a-kind pieces!

Students will upcycle items at school and share their creations on April 5th.

Possible Items to bring to school to upcycle:

Cardboard Boxes

Plastic bottles

Egg cartons

Paper towel and toilet paper rolls

Plastic food containers
